DETAILED ACTION

Status of the Claims

1. Claims 1-6 were amended by Applicant in correspondence on 04/04/2005. Claims 1-6 are currently pending. This is the first Office Action on the merits of the claim(s).

Priority

2. Acknowledgement is made of Applicant's claim for foreign priority under 35 U.S.C. § 119(a)-(d) based on an application filed in Germany on 10/04/2002.

Formalities

3. The information disclosure statement filed 5/4/2005 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because the foreign patent documents were not supplied by Applicant. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Rejections - 35 USC § 112 (2nd Paragraph)

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-6 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claims 1-6 provides for the "[u]se of 5-HT₂ receptor antagonists and physiologically acceptable salts and solvates thereof for the preparation of a medicament for extending both non-REM sleep and REM sleep." Since the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 1-6 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The claimed invention is directed to non-statutory subject matter. Patent eligible subject matter is limited to a process, machine, manufacture, or composition of matter. Claims 1-6 are considered "Use Claims," which are not covered by any of the four statutory categories, and are therefore not eligible for a patent.
